MFJ-1730 2-Meter Pocket Roll-Up Antenna

INTRODUCTION

Thank you for purchasing the **MFJ-1730 Pocket Roll-Up Antenna**. The MFJ-1730 is a $\frac{1}{2}$ wave roll-up J-Pole designed for the 2-meter band. Hang it and operate with MFJ roll-up antennas anywhere and everywhere! The MFJ-1730 comes completely assembled and is ready to connect to your radio with BNC connector; however, if your radio does not have a BNC connector, you will need an adapter (MFJ-7737).

OPERATION

1. Suspend the MFJ-1730 in a vertical position. The hole located in the end of the antenna can be used to hang the antenna. The antenna must be hung up using a non-conductive material such as a clothespin.
2. Do not set up the antenna so that it could touch a conductive object. This will cause detuning of the antenna. The antenna may also be detuned if it is set up close to any conductive object such as a metal window.
3. The antenna is designed to work without a ground plane, but operation may be enhanced when located over a large conductive surface like a refrigerator or file cabinet.
4. If the antenna will be permanently mounted outdoors, you may wish to weatherproof it by mounting it inside a length of 5/8" PVC. The PVC may affect the performance of the antenna.
5. Operate on the 2-meter band with no tuning needed.
